EXPERIENCE

Consultant, Minneapolis, MN

June 2015-present

Short to medium term technical consulting as a freelancer, including infrastructure management, user support, and applications upgrades.

Success English, Osaka, Japan — *ESL Teacher*

June 2014 - June 2015

English as a second language teacher for a leading school in Osaka, Japan. With school director taught children and adults both general and business English.

Consultant, Medellin, Colombia

May 2013 - April 2014

Worked with shared office space and other startups in Colombia to attract new users and clients. Assisted principals creating an online and social media presence for the company. Helped maintain IT infrastructure and work with English speaking clients.

Code:Red, Boston, MA and Hong Kong — *Consultant*

July 2011 - June 2012

Primary Asian representative for Boston based software company that specialized in software for financial firms. Supported local customers and coordinated with other consultants in NYC and Boston to assure high availability of Red Alerts software. Provided training, application customization, and advice for both end users and local IT support staff.

Yale Investments Office, New Haven, CT — *Assistant IT Director*

May 2005 - June 2011

Along with the IT Director managed all applications, infrastructure, and databases for a multi–billion dollar educational endowment. Assisted in implementation of virtualized storage and computing systems using EqualLogic hardware and the VMWare suite. Lead implementation of Code Red software, working with Yale investment professionals to customize the application. Managed handheld and portable computing resources for end users.

SKILLS

Deep knowledge of networking, web servers (Apache, IIS, NodeJS), as well as security and threat assessment. Wide experience with data rich web applications, SQL and NoSQL databases, and reporting services.

Fifteen years of experience in high demand technology environments with tight deadlines, demanding users, and constant team collaboration. Experience rolling out web sites and applications for customers, supporting users, and guiding technology choices.

APPLICATION KNOWLEDGE

GNU/Linux, Windows Server, Exchange, MongoDB and MS SQL, git, NodeJS and npm/nvm, apt, Gulp and other build tools, Docker, virtualization and container tools, various JavaScript frameworks, and many others. Experienced, professional writer.

EDUCATION – Yale, BA, Philosophy.
